## PROPOSED AMENDMENTS FOR DISCUSSION

2. (Currently Amended) A method for a wireless terminal participating in a packet-switched communications session to provide notice of receipt of an incoming circuit-switched call, the method comprising:

receiving a paging request associated with the incoming circuit-switched call; ~~and~~  
notifying a server that establishes and runs the packet-switched communications session that the wireless terminal has received the incoming circuit-switched call; ~~and~~  
notifying the server that establishes and runs the packet-switched communications session upon termination of the incoming circuit-switched call,

wherein notifying the server that establishes and runs the packet-switched communications session that the wireless terminal has received the incoming circuit switched call comprises forwarding a notification message from the wireless terminal to the server over a circuit-switched channel.

2. (Currently Amended) A method for a wireless terminal participating in a packet-switched communications session to provide notice of receipt of an incoming circuit-switched call, the method comprising:

receiving a paging request associated with the incoming circuit-switched call; and  
notifying a server that establishes and runs the packet-switched communications session that the wireless terminal has received the incoming circuit-switched call,

wherein notifying the server that establishes and runs the packet-switched communications session that the wireless terminal has received the incoming circuit switched call comprises forwarding ~~a notification~~ text message or an email message from the wireless terminal to the server over ~~a circuit-switched channel~~ the SMS data bearer.

SEMC Ref. No. PU03 0203US1  
MBSS Ref. No. 9314-70

2. (Currently Amended) A method for a wireless terminal participating in a packet-switched communications session to provide notice of receipt of an incoming circuit-switched call, the method comprising:

receiving a paging request associated with the incoming circuit-switched call; and

notifying a server that establishes and runs the packet-switched communications session that the wireless terminal has received the incoming circuit-switched call,

wherein notifying the server that establishes and runs the packet-switched communications session that the wireless terminal has received the incoming circuit switched call comprises forwarding a notification text message or an email message that includes an estimate of the duration of the incoming circuit-switched call from the wireless terminal to the server over ~~a circuit-switched channel~~ the SMS data bearer.
